

# Types, Coercion, and Equality

# Static Typing vs. Dynamic Typing

# Static Typing

```
int x = 5;
```

```
public int fn(String str) {  
    int x = 4;  
    return x;  
}
```

# Addressed at Compile Time

# dynamic typing

```
var x = 5;

function fn(str) {
  var x = 4;
  return x;
}
```

# Addressed at Runtime

# Strong Typing

# Ruby is Strongly Typed

```
2.0.0p247 :004 > 1 + "1"  
TypeError: String can't be coerced into Fixnum  
    from (irb):3:in `+'  
    from (irb):3  
    from /Users/jlembeck/.rvm/rubies/ruby-2.0.0-  
p247/bin/irb:13:in `'
```

# Weak typing

# JavaScript is Weakly Typed

> 1 + "1";  
'11'

# Weak typing and Coercion

3 + true === 4

true  $\Rightarrow$  1

“5” / “2” === 2.5

5 / “sandwich” //=> NaN

# NaN?

# Not a Number

5 / “sandwich” === NaN ?

**NaN !== NaN**

isNaN

isNaN( NaN )

# Arrays?

+

=

“ ”

> [1, 2] + [3, 4]  
'1, 23, 4'

`{}` + `{}` === `'[object Object]'`

**== VS ===**

**“1” == 1**

**“1” ! == 1**

1 == 1
